

edge-ucate is Edge Analytics' pupil projection model, providing a robust and transparent data analysis methodology to support school forecasting in local communities.

#### edge-ucate **early years**

edge-ucate Early Years provides intelligence on the current provision and future need for funded early years places.

#### edge-ucate **SEN**

edge-ucate SEN provides key intelligence on the current and future profile of pupils with special educational needs (SEN), to support Local Authorities in planning for SEN.

#### edge-ucate **pupil yield**

edge-ucate Pupil Yield provides a detailed data analysis method for deriving pupil yield factors; a crucial requirement in accurate school place planning.

## BENIFITS

**Bespoke reports can be developed to meet the specific reporting requirements**

**range of scenarios**

**forecasts to inform school place planning**

**Data validation and technical support**

**Combines the latest evidence**

**Forecasts and reports can easily be distributed**

**Cross-model comatibility**

**Annual updates refresh all data inputs**

 **edge analytics**
